

## Wolff's News

### *Hello, Candy Apples!*

What's one of the best things about fall? Candy apples, of course! Every weekend during the fall you can find red candy apples, caramel and peanut apples, and this super yummy one: "Mom's Apple Pie." (Just make sure to take a napkin... and don't tell your dentist!)

### *Check out our "Spooky Maze!"*

When you're done picking out your pumpkins, take a walk through our new spooky maze! Don't worry, it's not too spooky. But there are some good corners to hide around... for scaring Mom or Dad!

## Vegetable of the Month: WINTER SQUASH!

Winter Squash grow on vines like pumpkins do.

In fact, they are from the same plant family!

They are naturally

sweet, and if you add some syrup or honey, they can taste almost like a dessert!

A cool one to try is Spaghetti Squash, which comes apart into spaghetti-like strands after it is cooked!

Towards the middle of the fall season, try a special variety called "Delicata" --some people think that it's the sweetest!
